

## Product stewardship services

Today's global marketplace can be treacherous. Selling across multiple jurisdictions means multiple, overlapping regulatory compliance requirements. Buyers, ever conscious of their corporate reputations, are requiring more and more non-economic specifications from their suppliers.

Amec Foster Wheeler is with you throughout the lifecycle of your operation. We provide our clients with premiere expertise from inception with patent support and due diligence, through production with industrial hygiene and manufacturing efficiency support. Amec Foster Wheeler is also there in aid of distribution and marketing with regulatory compliance and product liability support. We can help in your product/ process end-of-life with expertise in waste impact, permitting, and recycling design.

Amec Foster Wheeler's stewardship group specializes in regulatory compliance and has extensive experience with not only the US and European Union legal requirements, but also

similar registration schemes globally (Canada, Mexico, Australia, Japan, China, etc.). Our stewardship groups can provide full toxicological assessment services, laboratory study management, chemical/environmental modelling, and life cycle analysis. We are dedicated to serving our clients by minimizing your cost liabilities while maximizing your realized benefits.
