Tree of ideas poster

from small acorns, great oaks grow

Guidance

The tree of ideas is a template for you to collect and display children's / student's ideas for change / actions that they will do for Earth Day and beyond.

The tree itself has numerous blank circles to give space for ideas to be added, plus space at the bottom to write the school or class name. For smaller children we have introduced the Acorns template, where they can draw their ideas of action, or what their idea of a clean environment / healthy Earth looks like.

Sharing your ideas with us

It would be great to see some of the ideas the children come up with and acknowledge the work of each class/group. The tree of idea posters will be shared across 50 countries and we would like to gather some of the best ideas from each school to see what children and students around the world suggest. We will gather all these ideas together and share to participating schools in a global round up.

To share your ideas tweet us at [@amec_fw](https://twitter.com/amec_fw) include the hashtags [#EarthDay](https://twitter.com/EarthDay) or [#AmecFosterWheeler](https://twitter.com/AmecFosterWheeler)

Share with us on Facebook at <https://www.facebook.com/amecfw>

Alternatively email to us at sustainability@amecw.com

Some ideas for your tree

Have a shower instead of a bath • turn off the tap when brushing your teeth • use the correct recycling bin at home and school • turn off the lights when you're the last to leave a room • don't sleep with a light on • plant a vegetable patch • walk or take your bike/scooter to school • use re-useable tubs in your packed lunch • reward kids who eat all their breakfast/lunch • help your parents to make your packed lunch – if it contains what you like you're less likely to waste food • use re-usable drinks bottles • nominate pupil 'eco-warriors' • ask parents to bring in old milk bottles/jars/cardboard boxes to use in art activities • take care not to lose/damage clothing • use waste paper for doodling • unplug laptop cables, phone chargers when not in use • switch off TV's, monitors, games consoles when not in use – don't leave on standby • use rechargeable batteries in toys • donate unwanted toys to a local charity.
